*“Here at SBG Accountants & Advisors we have mentored a large number of manufacturers through the start up phase of their business. We understand the pitfalls and can help you with everything you need including your business structure, website, branding, invoicing and software selection. When its time to employ apprentices and sub-contractors we can help you comply with the regulations. This is obviously in addition to the usual small business compliance issues of GST, BAS, PAYG and Superannuation.”*

*Paul Dobson - Director*

Having an accountant who understands your manufacturing business can provide significant benefits.

The truth is, running a manufacturing business in Australia is tough given the high labour costs. Not only that there are complexities such as managing inventory and costs, tracking customer orders, managing pending builds and assemblies plus identifying which orders have shipped. If you import components or export your finished goods you also face the volatility of the Australian dollar.

We have helped a number of exporters through the various stages of their business life cycle and can provide you with a range of accounting, tax and business coaching services to support and grow your business. If you need help with job costing, pricing, break even analysis or management accounting services we can assist you. We also use industry benchmarks to compare your business performance against your peers to help you assess what is working in your business and what needs working on.

*"We are business and profit builders who genuinely care about the success of your plumbing business. Over the past decade plumbers have become a real niche within our accounting practice and if you're looking to get your plumbing business off to a flying start or want to grow your existing business, call us today on (03) 9629 6744".*

*Paul Dobson - Director*
